

PRODUCT TITLE: SUDOE STAKEHOLDER NETWORK OF
KNOWLEDGE I – II

PRODUCT N°: 6.1 AND 6.2

AUTHORS: ARIANA PORTELLA ROJAS

REPORTING PERIOD: NOVEMBER 2020 - FEBRUARY 2023

NUMBER OF THE ASSOCIATED ACTION: 6.1 – 6.2

ORGANIZATION RESPONSIBLE FOR THE DELIVERABLE:
PLATAFORMA TECNOLÓGICA DEL VINO

1. INTRODUCTION AND OBJECTIVE OF THE SNK

The Consortium, led by PTV, has created and promoted a Stakeholder Network of Knowledge (SNK), with the aim of obtaining feedback and generating knowledge transfer during the implementation of the COPPEREPLACE project in the SUDOE region through participatory activities. All this, connected with the objective nº3.

Another objective of the COPPEREPLACE SNK has been to prepare proposals for the revision of legislation on organic agriculture foreseen in 2025 towards a more sustainable and transparent mode of production for the benefit of winegrowers, consumers and society in general.

The SNK was initially composed of the 13 COPPEREPLACE beneficiaries. Throughout the project, the network has been formed by other winegrowers in different SUDOE areas, public administrations, industry associations and other ancillary companies. Public administrations, industrial associations and other related ancillary companies, thus covering a wide range of agents within the SUDOE wine sector. On the other hand, it is worth mentioning that in the first meeting of the GT6, it was agreed among all the beneficiaries that the network participants would be classified according to their main activity into **technical advisors** and **political advisors**, for the benefit of the good development of the future meetings of the network to fulfil the specific work objectives, being the specific objectives of both advisors, the following:

Specific objectives of technical consultant:

- Diagnostic analysis to identify needs, barriers and opportunities.
- Provide specific consultancy on technical aspects (GT1, GT2 and GT3).
- Support in technical and economic integration activities (GT4 and GT5).
- Participation and assistance in communication actions (GT2).

Specific objectives of policy consultant:

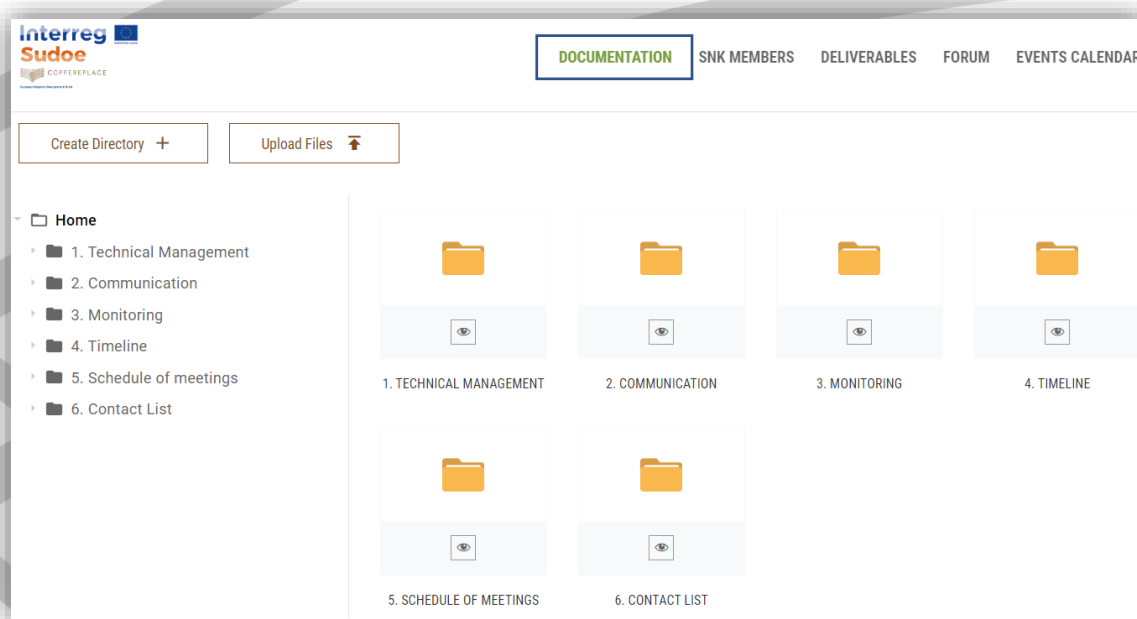

- Contribute to the revision of legislation on organic farming foreseen in 2025 towards a more sustainable and transparent mode of production for the benefit of winegrowers, consumers and society at large (GT6).
- Participation and assistance to communication actions (GT2).

Currently, the **SNK is made up of a total of 39 entities**, of which 34 are technical advisors and 5 are political advisors (ANNEX I).

2. GENERATION OF PRIVATE SPACE ON THE WEB

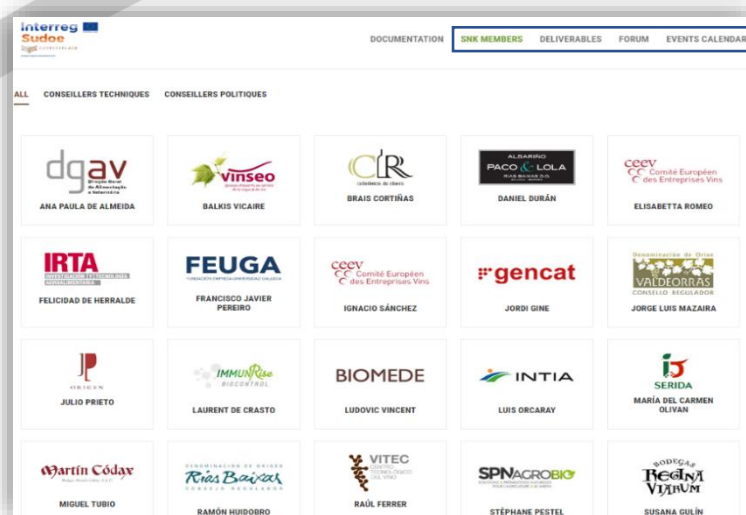

One of the activities in the framework of GT6, is the generation of a private web space (Intranet) for the exclusive use of project beneficiaries and SNK members, to be used as a multi-actor cooperation platform to share knowledge on the use and impact of copper in the SUDOE regions and across Europe as well.

The Intranet has a "Documentation" section, which has acted as a knowledge base (only for project beneficiaries, not for the rest of the SNK), with constantly updated information such as databases, project deliverables and progress, minutes of the meetings of each GT, calendar of meetings and events, project monitoring, etc.

In addition, the Intranet has "SNK Members", "Deliverables", "Forum" and "Events calendar" sections, which can be accessed by the entire SNK, where:

- SNK Members: section containing all SNK members classified into technical and political advisors.
- Deliverables: section where the deliverables and progress of all the GTs have been uploaded.
- Forum: area where SNK members can communicate, share documentation and discuss any topic of interest.
- Events calendar: section where all the events held within the framework of the project are recorded.

3. SNK ACTIVITIES AND RESULTS ACHIEVED

The objective was to develop a space in which the SNK actively participates in contributing to COPPEREPLACE objective 3 and materialising critical inputs at different levels: technical, legal, social, cultural, economic, environmental, etc. through **target working groups**.

Workshops or working world-café

Three participatory sessions (world-café or workshops), two technical sessions and one political session, were held with relevant actors of the COPPEREPLACE project and members of the SNK (**target group**).

First participatory session

The first session took place on 8 February 2022 online. In the first instance, the Focus Group (FG) was planned to be organised in person, as it favours the implementation of participatory dynamics. The meeting was planned for the end of November 2021. At that time, due to the increase in covid-19 infections, it was finally decided to postpone the session to February 2022. A total of **20 people participated** in the session, linked to the project as partners or as members of the SNK.

In this first session **the main objective was to analyse the perceptions and opinions of stakeholders towards a series of solutions and innovations** to reduce the application of copper in vineyards. The solutions presented were some of those proposed and evaluated in the framework of the **COPPEREPLACE** project. In this sense, the interest was to know the opinions of the participating experts from the different SUDOE production regions on the solutions introduced, as well as to assess the probability of their adoption and acceptance by the sector. The probability of adoption, however, is difficult to determine when there is no information on their cost.

In conclusion, the participatory workshop identified a **bottleneck** in the process of reducing the use of copper, which is the **cost and difficulties of registering new products**.

Second participatory session

The second session took place on 21 December 2022 at the Polytechnic University of Catalonia (UPC) in Castelldefels (Barcelona, Spain). A total of **8 people participated** in the session, linked to the project as partners or as SNK members.

The main objective of this session was to analyse the perceptions and opinions of the stakeholders towards a number of solutions and innovations of the COPPEREPLACE project. The innovations introduced were alternative products to copper.

On this occasion, as there were still no conclusive results to evaluate, the main objective of the session was the **qualitative assessment of the key success factors of copper substitution in viticulture**, keeping the technical aspects at the centre of the discussion.

The conclusions drawn from the second session are as follows:

- ✓ **Harmonise labelling with the same units for product doses.** The indications of dosage for copper were revealed as a difficulty for farmers. Participants claimed that labels can express the dosage in kilos per hectare or in percentage, and it is not always clear for farmers. The idea behind this problem is that, in case of doubt, some farmers may be applying an excess of copper.
- ✓ **Promotion and transfer of new technologies (e.g. VRA).** One of the ideas that gained traction was the need to expand the use of Variable Rate Application (VRA). Participants agreed that currently only large companies use the VRA, when it should be facilitated to reach out to small farmers. They considered that if this could be achieved, there would be a strong impact - in the SUDOE Region, but also in the EU as a whole - on the reduction of copper and all application products.
- ✓ **Use of sustainable agricultural practices** (e.g. phytodepuration, cover crops, etc.).
- ✓ **Training and transfer of knowledge, including on the farm (wine tourism).** The education and transfer of knowledge were strongly considered as determinant factors of influence. Particularly, participants were thinking about the knowledge to be transferred to producers, vine workers and technicians, while technical and academic education was also noted. Furthermore, the participants considered that the costs of being environmentally sustainable is generally not transferred to the final price, although it should be. The reason the more that consumers need to be aware of what it takes to accomplish these demands. In this sense, wine tourism, as a way to educate consumers on the farm, and environmental accountability were also proposed.

Third participatory session

The second session took place on 21 February 2023 at the Polytechnic University of Catalonia (UPC) in Barcelona (Spain). A total of **14 people participated** in the session (**12 in person and 2 online**), linked to the project as partners or as members of the SNK.

On this occasion, the **main objective** of the session was to evaluate the results obtained in the project, **to analyse the current legislation and to propose actions that can be taken for sustainable organic production.**

The conclusions drawn from this political workshop were as follows:

- ✓ During the project life, some difficulties (barriers to experimentation with the extracts) were found between countries and their national registers (different legislation), which it makes no sense at the EU level.
- ✓ More effort from companies should be done to obtain better results from field trials.
- ✓ During this session, as in the second participatory session, it was also commented that the promotion and transfer of new technologies (such as VRA) would be ideal. The importance of harmonising labelling with the same units for product doses was also mentioned.

MINISTÈRE DE L'AGRICULTURE ET DE L'ALIMENTATION

Le directeur général de l'alimentation

Paris, October 25th, 2019

EXPRESSION OF INTEREST IN **COPPEREPLACE** PROJECT PROPOSAL FOR INTERREG SUDOE 4th CALL

The Directorate general for food, in the Ministry of Agriculture and Food, is aware of the preparation of the **COPPEREPLACE** project proposal under the INTERREG V-B SUDOE Programme (4th call) by a consortium formed by entities from 3 different countries (Spain, Portugal, France) from the SUDOE territory.

COPPEREPLACE aims to establish a holistic concept to improve crop care process in viticulture by developing a sustainable, safe and cost-effective use of copper. Adequate dose adjustment to canopy structure, precise spray distribution, new effective products and alternative strategies to copper, recovery actions to eliminate copper in the soil, will be measures implemented to achieve a cost-effective ecological viticulture management system with a controlled and reduced use of this toxic component, in line with the new EU restrictions and the French agenda regarding the reduction of copper use in agricultural and non agricultural uses.

This topic is of great interest for the Ministry, I therefore fully support the **COPPEREPLACE** proposal.

Should the proposal be awarded, I would like to be informed of its future progress and results.

Yours sincerely,

Le Directeur Général de l'Alimentation

To whom it may concern,

I am writing this letter on behalf of BIOMEDE, which expresses our interest in sharing knowledge about the use and impact of copper in the SUDOE regions and across Europe, through the COPPEREPLACE Stakeholder Knowledge Network.

Our commitment is embodied in this Letter of Expression to participate as Expert member of the Stakeholder Knowledge Network (SNK), in accordance with the guideline "COPPEREPLACE Stakeholder Knowledge Network on Copper" that was sent to us.

We express our interest in participating in this project (Please choose the level of commitment):

- **As an active member of SNK**, participating at different levels (technical, legal, social, cultural, economic, environmental) through working groups (3 participatory sessions as world-café or workshops as mentioned in document enclosed "Activities and role of SNK").

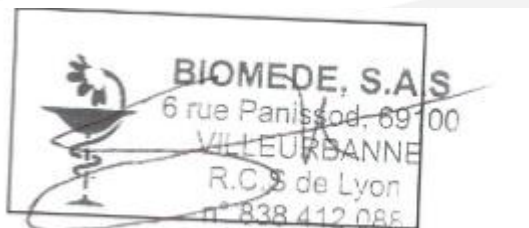

This issue is of great interest for our entity, so considering the alignment of the project objectives with ours, our organization fully supports the COPPEREPLACE PROJECT and its Stakeholder Knowledge Network.

Yours sincerely,

BIOMEDE, represented herein by

Ludovic VINCENT

Subject: Expression of interest as a stakeholder member in the COPPEREPLACE Project to share knowledge on the use and impact of copper in the SUDOE regions and across Europe

Dear Sir or Madam,

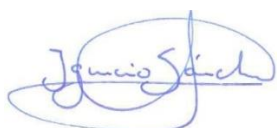

I am writing this letter on behalf of Comité Européen des Entreprises Vins – CEEV, to express our interest in sharing knowledge about the use and impact of copper in the SUDOE regions and across Europe, through the COPPEREPLACE Stakeholder Knowledge Network.

Our commitment is embodied in this Letter of Expression to participate as **political** member of the Stakeholder Knowledge Network (SNK), in accordance with the guideline “COPPEREPLACE Stakeholder Knowledge Network on Copper” that was sent to us.

We express our interest in participating in this project **as an active member of SNK**, participating at different levels (technical, legal, social, cultural, economic, environmental) through working groups (3 participatory sessions as world-café or workshops as mentioned in document enclosed “Activities and role of SNK”).

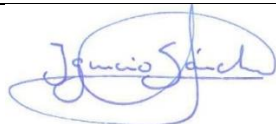

This issue is of great interest for our entity, so considering the alignment of the project objectives with ours, our organization fully supports the COPPEREPLACE PROJECT and its Stakeholder Knowledge Network.

Yours sincerely,

Dr Ignacio Sánchez Recarte
Secretary General of Comité Européen des Entreprises Vins – CEEV

**EXPRESSION OF INTEREST AS A STAKEHOLDER MEMBER IN THE COPPEREPLACE
PROJECT TO SHARE KNOWLEDGE ON THE USE AND IMPACT OF COPPER IN THE
SUDOE REGIONS AND ACROSS EUROPE**

To Ariana Portella
Project manager COPPEREPLACE
Plataforma Tecnológica del Vino
C/ Musgo, 2. Bajo B. Edificio Europa II
28023 Madrid
Spain

Caldes de Montbui, 29/07/2021

To whom it may concern,

I am writing this letter on behalf of **Institute of Agrifood Research and Technology (IRTA) and coordinator of the NOVATERRA project**, which expresses our interest in sharing knowledge about the use and impact of copper in the SUDOE regions and across Europe, through the COPPEREPLACE Stakeholder Knowledge Network.

Our commitment is embodied in this Letter of Expression to participate as **Expert** member of the Stakeholder Knowledge Network (SNK), in accordance with the guideline "COPPEREPLACE Stakeholder Knowledge Network on Copper" that was sent to us.

We express our interest in participating in this project (Please choose the level of commitment):

As an active member of SNK, participating at different levels (technical, legal, social, cultural, economic, environmental) through working groups (3 participatory sessions as world-café or workshops as mentioned in document enclosed "Activities and role of SNK".

This issue is of great interest for our entity, so considering the alignment of the project objectives with ours, our organization fully supports the COPPEREPLACE PROJECT and its Stakeholder Knowledge Network.

Yours sincerely,

**EXPRESIÓN DE INTERÉS COMO MIEMBRO DE LAS PARTES INTERESADAS EN EL PROYECTO
COPPEREPLACE PARA COMPARTIR CONOCIMIENTOS SOBRE EL USO Y EL IMPACTO DEL COBRE
EN LAS REGIONES DE SUDOE Y EN TODA EUROPA**

Para **Tamara Rodriguez Silva**
EU project and communication manager
Fundación Empresa Universidad Gallega - FEUGA
ESPAÑA

Cambados, 22 de julio de 2021

a quien corresponda

Escribo esta carta en nombre de **BODEGAS MARTIN CODAX, SAU**, que expresa nuestro interés en compartir conocimientos sobre el uso y el impacto del cobre en las regiones SUDOE y en toda Europa, a través de la Red de Conocimiento de Las Partes Interesadas coppereplace.

Nuestro compromiso está plasmado en esta Carta de Expresión de participar como miembro experto de la Red de Conocimiento de Partes Interesadas (SNK), de acuerdo con la directriz "Red de Conocimiento de Partes Interesadas copperepace sobre cobre" que nos fue enviada.

Expresamos nuestro interés en participar en este proyecto:

Como miembro activo de SNK, participando a diferentes niveles (técnico, legal, social, cultural, económico, ambiental) a través de grupos de trabajo (3 sesiones participativas como world-café o talleres como se menciona en el documento adjunto "Actividades y papel de SNK").

Este tema es de gran interés para nuestra entidad, por lo que considerando la alineación de los objetivos del proyecto con los nuestros, nuestra organización apoya plenamente el PROYECTO COPPEREPLACE y su Red de Conocimiento de Grupos de Interés.

atentamente

BODEGAS MARTIN CODAX, representado en este documento por
